RESIDENTIAL-ONE AND TWO FAMILY DWELLINGS

**RE-ROOF PERMIT APPLICATION
2013 CALIFORNIA RESIDENTIAL & ENERGY CODES**

PERMIT #: _____

PROJECT ADDRESS: _____

OWNER: _____

CONTRACTOR INFORMATION: _____

Company Name

Address

Phone Number

BUILDING USE: Single Family Duplex

VALUATION – TOTAL COST OF ROOFING MATERIAL AND LABOR: _____

PROPOSED ROOFING MATERIAL:

Wood Shake/Shingles Asphalt Shingle/Composition Single Ply Metal

Built-Up/Torch Down/Rolled Heavy/Light Weight Tile Foam/Liquid Coating Other _____

Installed Weight of Tile: _____ Roof Slope: _____ Roofing Area: _____

Tear Off Overlay (Only one existing may remain)

ROOFING MATERIAL INFORMATION & APPROVALS:

(Note: Material required to be on site for inspector's verification)

Manufacturer's Name _____ ICC Evaluation Report No. _____

CRRC Product ID No. _____ Solar Reflectance: _____ Thermal Emittance: _____ SRI: _____

Cool Roof Exception Requested (see page 2 of this form)

COMMENTS: _____

COOL ROOF PRODUCTS SHALL MEET THE REQUIREMENTS AS NOTED BELOW:

CALIFORNIA ENERGY CODE

SECTION 150.2 ROOF REPLACEMENTS - LOW-RISE RESIDENTIAL ONE AND TWO FAMILY DWELLINGS

STRUCTURE	LOW-SLOPE < 2/12	STEEP SLOPE	SOLAR REFLECTANCE (MINIMUM)	THERMAL EMITTANCE (MINIMUM)	SRI	NOTES	EXCEPTIONS
LOW-RISE RESIDENTIAL	X		0.63	0.75	75	1	f
LOW-RISE RESIDENTIAL		X	0.20	0.75	16	2	a-b-c-d-e-f-g

EXCEPTIONS: (Circle which exception you are requesting)

- a. Air-space of 1.0 inch is provided between the top of the roof deck to the bottom of the roofing product. (Note: Air space not allowed over existing wood shingle or shake roofs); or
- b. The installed roofing product has a profile ratio of rise to width of 1 to 50 for 50 percent or greater of the width of the roofing product; or
- c. Existing ducts in the attic are insulated and sealed according to Section 150.1(c) 9. (Note: HERS rating required with CF3R Form); or
- d. Building has at least R-38 ceiling insulation. (Note: Insulation certification required); or
- e. Building has a radiant barrier in the attic meeting the requirements of Section 150.1(c) 2.; or
- f. Building has no ducts in the attic; or
- g. Minimum R-4 or greater insulation is installed above the roof deck. (Note: If foam plastic insulation is used, the roof sheathing must be T&G or blocked).

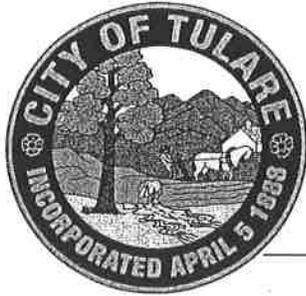

NOTES:

- 1. The aged solar reflectance can be met by using insulation at the roof deck specified in Table 150.2-A.

**TABLE 150.2A
AGED SOLAR REFLECTANCE INSULATION TRADE OFF TABLE**

AGED SOLAR REFLECTANCE	ROOF DECK INSULATION R-VALUE	AGED SOLAR REFLECTANCE	ROOF DECK INSULATION R-VALUE
0.62-0.60	2	0.44-0.40	12
0.59-0.55	4	0.39-0.35	16
0.54-0.50	6	0.34-0.30	20
0.49-0.45	8	0.29-0.25	24

- 2. Attic ventilation is required to meet current the California Residential Code requirement when roofing with composition shingles due to the manufacturer’s warranty requirements. Ventilation area must equal one square foot for each 300 ft² of attic floor area. Ventilation must be installed with 50% high and 50% low. Low vents must be distributed equally around the structure.

RESIDENTIAL REROOF PROCEDURES FOR COOL ROOF PRODUCTS **2013 CALIFORNIA ENERGY CODE SECTION 150.2(b) H**

Beginning July 1, 2014 the 2013 California Energy Efficiency Standards will go into effect and require all re-roofing to meet the Cool Roof requirements of the updated Title 24 Energy Standards. Roofing products that are used for compliance with the standards are required to be tested and labeled by the Cool Roof Rating Council (CRRC)

The new 2013 California Energy Code has revised the list of alternatives that can be used as an exception to the Cool Roof requirements. This bulletin is designed to provide the new exceptions allowed in the 2013 Standards and how the local jurisdictions will document and verify compliance with the exceptions.

2013 Cool Roof Exceptions:

- a. Air-space of 1.0 inch airspace is provided between the top of the roof deck to the bottom of the roofing product; **or**
- b. The installed roofing product has a profile ratio of rise to width of 1 to 5 for 50% or greater of the width of the roofing product; **or**
- c. Existing ducts in the attic are insulated and sealed according to Section 150.1(c)9, HERS rating required with CF-3R Form; **or**
- d. R-38 attic insulation (Insulation Certificate required); **or**
- e. Building has a radiant barrier in the attic meeting the requirements of Section 150.1(c)2, **or**
- f. Building has no ducts in the attic. **or**
- g. R-4 insulation installed on the deck above vented attic.

As shown above, the exception by providing increased attic ventilation has been removed in the 2013 Standards, and insulation values have increased.

- If exception "c" is proposed, it shall be required that a duct leakage test be provided and certified by a third party HERS rater.
- If exception "d" is proposed, it shall require an Insulation Certificate be provided by a licensed Insulation Contractor to verify the minimum R-38 attic insulation exists.

**CITY OF TULARE
CONSTRUCTION AND DEMOLITION DEBRIS
RECYCLING AND REUSE PLAN
Vendors & Facilities**

In Table 1, list all recyclers, waste haulers, deconstruction contractors, salvage companies, recycling facilities, materials recovery facilities, landfills, and transfer stations that will be used for disposal, recycling, or reuse of project construction and demolition (C&D) debris. List any potential alternative vendors and facilities to be used. This will avoid the need to submit an amended RRP in case the services of a vendor or facility outside of the original selection are used.

Obtain Handling Method and Estimated Recycling Rate by contacting each facility.

TABLE 1

Material Hauling Company	Address of Facility Where Materials will be Delivered	Facility Phone Number	Facility Handling Method	Estimated Recycling / Reuse Rate (%) (if applicable)	Final Total Tonnage Recycling / Reuse Rate (%)

*Provide a description of the manner in which the project C&D debris will be handled (recycled, reused, salvaged, disposed, processed, etc.)

**The Recycling / Reused Rate is the amount of material recycled / reused by a facility divided by the amount of material delivered to that facility.

Please sign below if you are the owner(s) or Legal representatives(s)

Note that any violation of the provisions of Chapter 7.18 of the City of Tulare Municipal Code will be subject to an penalty, enforcement, and collection proceedings, as set forth in this Chapter and authorized by Section 53069.4 of the California Government Code. The Building Official or Designee may withhold approval of any and all C&D Debris Recycling and Reuse Plans submitted by the responsible person on any project(s) until the applicable penalty has been paid. In addition, the amount of any unpaid penalty may be declared a lien on any real property on which the project took place.

The undersigned fully acknowledges the requirements of Chapter 7.18 – Recycling and Diversion of Construction and Demolition Debris. If you are not the owner(s), attach a notarized statement indicating you are the legal representative.
