

IMPORTANT NOTICE

Wipes & Personal Hygiene Products Clog Sewer Lines!

Unlike toilet paper, many household products labeled as **DISPOSABLE** and/or **FLUSHABLE**, such as baby and adult personal hygiene products, ***DO NOT*** break down once they are flushed. They can cause blockages in your on-site sewer, **especially older pipelines that may have greases, roots, or other obstructions already existing**. A repair of the on-site sewer line can leave the home owner or business owner with a **very costly sewer repair**.

On a larger scale, when these products make their way into the public sewer system they collect together, causing very large obstructions and clogs in the main collector lines and get tangled in pump stations and require repair or replacement of equipment.

What We All Can Do To Help...

The following items should ***NEVER*** be flushed into the sewer system:

ANY Moist type towelettes	Feminine hygiene products
Baby wipes	First Aid wipes
Bio-pads (nursing home, home health care, etc.)	Flushable wipes
Cloth (clothes, cloth diapers, sheets, socks, towels/wash cloths)	Jewelry wipes
Condoms	Mop or "Swiffer" type refills
Cosmetic wipes	Paper towels or Napkins
Cotton swabs	Pet care wipes
Disinfecting/surface wipes	Toilet cleaning pads
Disposable diapers or diaper liners	

➔ OR ANY OTHER CONSUMER ITEM THAT IS NOT TOILET PAPER!

Every home and business has a sewer connection to the public sewer system. This connection runs from the home or business to the sewer main where it is connected to the public sewer system. This on-site sewer line is the responsibility of the home or business owner to keep clear so there are no back-ups of wastewater into the home or business. Save yourself and your Sewer Utility from costly repairs and/or replacement bills.

Do not flush the listed items; place them in the trash, not the toilet.
