

HOUSEHOLD BATTERY COLLECTION PROGRAMS

Batteries contain toxic metals and it is illegal to dispose of them in the trash. The City of Tulare offers two different programs to accommodate the proper disposal for their residents.

Our program accepts most types of household batteries. (dry cell, alkaline, NiCad, button, lithium and rechargeable) **(AA, AAA, C, D, 6 or 9-VOLT, & BUTTON TYPE)**

For safety, please tape over the contact points of each lithium battery (button type and rechargeable).

We CANNOT accept automotive or motorcycle batteries.

DROP OFF—You may drop off your household batteries at the City of Tulare Corporation Yard at 3981 So. 'K' Street, Monday—Friday 8:00am to 4:00pm

CURB SIDE—Put household batteries into a clear plastic zip-type bag and seal it.

Place the sealed bag on the front half of the lid on any of your automated containers when you set it out on your collection day.

DO NOT place Battery Bags INSIDE any of your collection containers.

Follow the pictures below. IT'S AS EASY AS "A, B, C."

First, put your batteries in a clear plastic zip-type baggie until 3/4 full. Please tape over the contact points of each lithium battery. **(Picture A)**

Second, leave 3/4 full clear plastic zip-type baggie on top of the **FRONT HALF OF LID.** **(Picture B)**

Third, your driver will take the 3/4 full clear plastic zip-type baggie off of the lid before he dumps the can. **(Picture C)**
